(54) COMPUTER EDUCATION SYSTEM USING WIRE AND WIRELESS COMMUNICATION

(57) Abstract:

PURPOSE: A computer education system using an wire and wireless communication is provided to make more convenient computer education environment by displaying simultaneously both the screen of a teachers PC and the screen of a students PC without a special projector/TV. CONSTITUTION: A computer education system using an wire and wireless communication comprises a students PC (200) and a teachers PC(100). There are at least over a students PC. The teachers PC(100), connected with the students PC(200), transfers the screen information of the teachers own PC(100) to the students PC(200). The screen information of the teachers PC(100), which is responding to the control signal sent from the students(200) or the teachers PC(100), is displayed on the students PC(200). The result is that the screen of the teachers PC(100) can be much clearly displayed on the screen of every students PC(200) without a special projector/TV.
